The Air Force Association’s CyberPatriot National Youth Cyber Education Program was created to motivate K-12 students toward careers in cybersecurity and other STEM disciplines.

In the fall of 2017, CyberPatriot launched its Cyber Education Literatures Series to excite the youngest of computer users about cybersecurity.

**SARAH THE CYBER HERO**

Sarah lives in a town full of superheroes, but she has yet to earn her own superhero cape. The tradition is that when you save the day you earn your cape, but how will Sarah ever get a cape when her older brother, Andy, swoops in every time!

One fateful day, Andy downloads a malware virus on the family computer – one that infects the whole town.

Luckily, a school cyber education program has been teaching Sarah all about cyber safety and how to protect a computer from intruders. Can she use her new cyber skills to stop the dreaded virus from spreading?

**BEN THE CYBER DEFENDER**

Ben is a typical kid with a not-so-typical passion for cybersecurity and helping others. His skills are put to the test when his cousin, Ethan, accidentally releases a virus that is set to ruin devices all over town.

Can Ben stop the cyberattack in time and prove that he is ready to be a true cyber defender?
